Chairman Speech

Dear Shareowners,

It gives me immense pleasure to extend a warm welcome to you all to the 30th Annual General Meeting of your company.

In view of the massive outbreak of the COVID-19 pandemic, social distancing is a norm to be followed and pursuant to the Circulars issued by the Ministry of Corporate Affairs, AGM is being held through Video Conferencing (VC) or Other Audio Visual Means (OAVM).

Before I speak to you about the performance of your company, let me briefly highlight the economic scenario in which your Company is operating.

The Indian steel market has started showing signs of recovery after being hit hard by the COVID-19 pandemic and subsequent lockdowns. This sector has been relatively been more vibrant and has been growing at a CAGR of about 6- 7% year-on-year.

With recovering trend in iron and steel sector overall financial performance of your company has been better in comparison to the previous year performance. Yours company Ashiana achieved Gross revenue for the year ended March 31, 2022, rose 48.74% to Rs.43899.30 Lacs, compared with Rs.29514.69 Lacs in the corresponding period of previous year. Consolidated total income for the quarter ended March 31, 2022, was up 8.92% to Rs.156.67 Lacs compared with Rs.143.83 Lacs in the corresponding period of the previous year.

Demand of the TMT Bar picked up from the second quarter and further improved in the second half of the financial year. Increased demand for KAMDHENU brand TMT Bar enabled us to scale up production. Your Company continuously working on adoption of improved technology and better logistic support to the consumer. Among the secondary steel producers in the RIICO Industrial Area, we are the first to bring in automation and several other innovations that set new benchmarks for the industry, Ashiana has always been a pioneer in adapting to technological advancements.

Steel is an essential commodity. In terms of modern infrastructure, TMT steel bars are significant products. At present times, there are many construction projects happening around us, such as dams and bridges that need low-cost reinforcement bars. Such construction projects and governmental support for steel production have been driving the TMT steel bars market.

The investment focussed Union Budget 2022 and the growth supportive measures taken by the Government viz. increased allocations for capital expenditure under the NIP, the expanded production-linked incentives (PLI) scheme, FDI policy, and the ease of doing business will only reinforce the process of economic revival. The support by a credit expansive interest regime will provide further fillip to the investment climate.

The major impact of Covid-19 on financial position of the company is being seen in the form of increase in Days Sales Outstanding (DSO) ratios. Your management is regularly in touch with debtor and pursuing them to clear their dues. We are getting better response from debtor as their business is also recovering from the impact of Covid-19 pandemic. We have optimistic approach to deal with the challenges thrown by the pandemic time. Apart from the

enhancement of production and increasing the market share by launching **KAMDHENU NXT AND KAY2 XENOX** we are giving proper attention in bringing Days Sales Outstanding (DSO) ratios within the standard bench mark of the industry.

We have taken a variety of initiatives over the years to promote our market shares in the entire NCR of Delhi and further planning to gradually utilise the enhanced production capacity. Ashiana Ispat is planning for a lengthy period of subdued economic activity. However, we remain optimistic that we will rise to the challenge of COVID and continue to prosper.

We are hopeful that the measure taken by us will improve the overall performance of the company.

Acknowledgement

On behalf of the Board of Directors, I sincerely thank the shareholders, customers and all stakeholders for their continued support in the Company's future endeavours. I would like to place on record the sincerity, hard work, commitment and dedication of the employees.

Dear shareholders, as we all know India has celebrated the 75 glorious years of being an Independent country which is a matter of pride and honour for all of us. In this regard it is very much imperative for all of us to put our collective efforts in shaping the destiny of our motherland, to make our nation a world leader in the global economy that will help us collectively creating a better tomorrow for our future generations. Azadi ka Amrit Mahotsav, as we all are celebrating this year, implies that we all should rise up and play our part individually as well as collectively so that our ideas and efforts will translate into definitive actions for making India a global leader.

I also express my sincere thanks to State Bank of India, Yes Bank and Institutions for the support and coordination given to the company regularly. It will certainly be our endeavour to put in our best efforts for sustained growth, expansion and prosperity of the Company benefitting all stakeholders.

➤ **State of Company's affairs:**

World is witnessing the second wave of the COVID-19 pandemic. Businesses are once again feeling the heat with the uncertainty of restrictions and lockdowns amid the rising number of cases. In FY 2021-22, the pandemic landed a severe blow to the construction industry as well as Iron and Steel industries. Despite the difficult year, we registered a positive EBITD of ₹1053.18Lacs. During the year under consideration, company's PBT rose to ₹156.67 Lacs from ₹ 143.83Lacs in the previous year.

Disruptive forces (environmental issues) that caused loss in the year 2019-20 and pandemic COVID 19 that damaged the foundation of business globally could not shook our spirit. In the midst of tsunami we have reorganised our untapped potential and have incorporated it into our business processes. Among the secondary steel producers in the RIICO Industrial Area, Bhiwadi, we are the first to bring in automation and several other innovations that set new benchmarks for the industry, Ashiana has always been a pioneer in adapting to technological advancements.

- a. Substantial Expansion of production capacity: Installed capacity increased from 134000 MT to 240000 MT per annum.

- b. Launching two new cost effective products to serve the need of every segment of customers:

► KAMDHENU NEXT

► KAY2XENOX

KAMDHENU NEXT AND KAY2 XENOX aspires to occupy a preeminent position in the steel industry by achieving manufacturing excellence and having a consistently satisfied customer base. Automation of plants will reduced the production costs to the extent of Rs.150 to 200/- Per ton.

➤ **IMPACT OF COVID-19 PANDEMIC**

Ashiana Ispat Limited is the manufacturer of Steel TMT Bars used in construction and infrastructure sector. Weak demand from infrastructure on account of lower capex by Government and gradually decrease in purchasing power of buyer will hurt steel demand. The lower infrastructure capex in on account of diversion of funds towards health and public welfare will be the main concern before steel industry.

As we all are aware that population of 1.3 billion stays indoors to fight the Covid-19 virus, India is facing very difficult situation and worry about the economy as the entire industrial activity has been jeopardized.

The lockdown has brought the entire domestic manufacturing supply chain to a grinding halt. "Ramifications of a massive lockdown are manifold. It is assumed that steel demand in India would contract 14-17% this fiscal. Extended vulnerability, on the other hand, will increase the demand contraction to 22-25%. On a quarterly basis, steel demand would be awash out in the first quarter of this fiscal, given the pan-India lockdown that would hurt construction.

Since this situation is exceptional and changing dynamically, the Company is not able to gauge with certainty, the future impact on its operations. However, the Company is confident about adapting to the changing business environment and respond suitably to fulfil the needs of its customers.

Demand of the product being manufactured is expected to be remain less. Sales below the BEP will impact the revenues and profitability. However actual impact would be ascertained in due course of time.

MANAGEMENT DISCUSSION AND ANALYSIS

The Management of Ashiana Ispat Limited presents its analysis report covering performance and outlook of the Company. The core business of the Company is manufacturing TMT Bar. It has its registered office located at RIICO Industrial Area, Bhiwadi, Alwar, Rajasthan. The Management accepts responsibility for integrity and objectivity of the Financial Statements of the Company.

Financial review:

Ashiana Ispat Limited has reported profit of Rs 1.56 crore in the year ending March 31, 2022 on a standalone basis against Profit of Rs 1.43 crore in the same period of last year. Total Gross revenue stood at Rs 438.99 crore against Rs 295.15 crore in the previous year ended 31.03.2021.

The year 2022 was a mixed year for the Indian economy. With massive vaccination drive, ease in travel and social distancing relaxations and various stimulus packages announced by the Government, the Indian economy steered forward gradually showing signs of steady and positive revival during the year 2021-22.

Industry Structure and Developments:

India's gross domestic product (GDP) reflected at 8.7% in 2021-22. Since the second half of 2021, global steel prices have risen dramatically, particularly in the United States and Europe. Increase in import costs further led to higher production costs for the global steel product makers, negatively impacting profitability thereon

With the cumulative efforts of Government and RBI, Indian Economy managed to get back its foothold in the quickest possible time and undertook multi-dimensional policy interventions to minimise the impact of the crisis. With relaxation of various restrictions and also various stimulus packages announced by the Government from time to time, the Indian economy demonstrated major progress.

Opportunity, Threats, Risks and concerns

India is the world's second- largest producer of steel. The Covid-19 outbreak and supply chain disruptions impacted the Steel market in India. In comparison to international steel pricing, domestic steel prices remain low. However, in the first half of 2021, the second wave of the pandemic proved to be much more devastating than the first one.

But despite the country being in the grips of a more severe second wave of the pandemic, factors like a faster and wider vaccination drive, limited lockdowns and robust demand from consumers helped maintain growth. Following the ease in lockdowns, the Indian steel producers raised prices significantly in the recent quarter

During the second half of the year 2021-22, the Indian economy faced major issues like coal supply scarcity, energy crisis, and growing inflation, thereby affecting the manufacturing industry. Also, with the WAR GOING ON BETWEEN Russia and Ukraine, inflationary conditions built monumental pressure on the economic growth which was already taking baby steps towards achieving a steady growth level, thereby affecting the major manufacturing and related activities in India.

However, despite all these ongoing challenges, Indian economy looks promising in terms of its overall growth prospects. The RBI has projected the Indian economy to grow by 7.2% in 2022-23. But, here again rising fuel prices and ever increasing inflationary conditions obviously pose a threat to achieve this growth figure. However, with the various recovery measures undertaken by the Indian Government, India continues to be an attractive destination for investors. To further strengthen the overall domestic Manufacturing sector and make India self-reliant, the Government announced a massive 20-lakh-crore stimulus package to elevate economic growth and provide much-needed liquidity to the MSME sector under its flagship programme, 'Atmanirbhar Bharat Mission'.

The steel production capacity in India increased from 1,540 Million Tonnes Per Annum (MTPA) in 2011, to 1,850 MTPA in 2021. The Union Budget 2022- 23 focuses on providing infrastructure push towards seven engines (Roads, Railways, Airports, Ports, Mass Transport, Waterways and Logistic Infra). The allocation for various schemes like Pradhan Mantri Awas Yojana (PMAY) scheme, and Jal Jeevan Mission will lead to opportunities in the Steel industry.

2. BASIS OF PREPARATION OF FINANCIAL STATEMENTS**A) Statement of compliance**

These financial statements have been prepared in accordance with the Indian Accounting Standards (referred to as "Ind AS") prescribed under section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules as amended from time to time.

B) Use of judgments, estimates and assumptions

The preparation of the financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets & liabilities, income, expenses and accompanying disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates under different assumptions and conditions. Any revision in accounting estimates is recognized prospectively in the period of change and material revision, including its impact on financial statements, is reported in the notes to accounts in the year of incorporation of revision.

In accounting policies, management has made judgments in respect of evaluation of recoverability of deferred tax assets, which has the most significant effect on the amounts recognized in the financial statements.

The following are the key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within :

- a) Useful life of property, plant & equipment and intangible assets: The Company has estimated useful life of the property, plant & equipment as specified in Schedule II to the Companies Act, 2013. However the actual useful life for individual equipments could turn out to be different, there could be technology changes, breakdown, and unexpected failure leading to impairment or complete discard. Alternately, the equipment may continue to provide useful service well beyond the useful life assumed.
- b) Taxes: Taxes have been paid/ provided, exemptions availed, allowances considered etc. are based on the extant laws and the Company's interpretation of the same based on the legal advice received wherever required. These could differ in the view taken by the authorities, clarifications issued subsequently by the government and courts, amendments to statutes by the government etc.

- c) Defined benefit plans: The cost of defined benefit plans and other post-employment benefit plans and the present value of such obligations are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future.
- d) Provisions: The Company makes provisions for leave encashment and gratuity based on report received from the independent actuary. These valuation reports use complex valuation models using not only the inputs provided by the Company but also various other economic variables. Considerable judgment is involved in the process.
- e) Provisions: The Company makes provisions for leave encashment and gratuity based on report received from the independent actuary. These valuation reports use complex valuation models using not only the inputs provided by the Company but also various other economic variables. Considerable judgment is involved in the process.

C) 1. Property, plant and equipment

These tangible assets are held for use in production, supply of goods or services or for administrative purposes. These are recognized and carried under cost model i.e. cost less accumulated depreciation and impairment loss.

- i) Cost includes freight, duties, taxes and other expenses directly incidental to acquisition, bringing the asset to the location and installation including site restoration up to the time when the asset is ready for intended use. Such Costs also include Borrowing Cost if the recognition criteria are met.
- ii) When a major inspection/repair occurs, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied.
- iii) Depreciation has been provided on straight line method in terms of expected life span of assets as referred to in Schedule II of the Companies Act, 2013.
- iv) For Additions in tangible assets, all direct expenses and direct overheads are capitalized till the assets are ready for intended use.
- v) During sales of Tangible assets any profit earned / loss sustained towards excess / shortfall of sale value vis-a- vis carrying cost of assets is accounted for in statement of profit & loss.

II. Capital Work in Progress

Capital work in progress includes apart from value of the component various incidental expenses incurred during implementation such as Director Remuneration, Salary and wages of technical staff and labour, fuel used, interest on loan taken for plant and equipment components, consumables stores, technical and consultancy services, other erection and commissioning expenses and capital work in progress is transferred to respective fixed assets when it becomes operational.

**D) Impairment of assets**

There are no indication of overall impairment in assets hence the need to make an estimate of recoverable amount does not arise.

E) Inventories

Raw Material, Stock in process and stores and spares and traded goods are valued at cost. Waste and Scrap including Mill Scale are valued at Net realizable Value; finished goods are valued at cost or market price whichever less

F) Tax Expenses

The tax expense for the period comprises of current tax and deferred income tax. Tax is recognised in Statement of Profit and Loss, except to the extent that it relates to items recognised in the Other Comprehensive Income or in equity. In which case, the tax is also recognised in Other Comprehensive Income or Equity

i) Current tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the Income Tax authorities, based on tax rates and laws that are enacted at the Balance sheet date.

ii) Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Financial Statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

G) Borrowing Cost

Borrowing costs directly attributable to the acquisition, construction or production of an asset are capitalized as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur.

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

H) Provisions, Contingent liabilities, Contingent Assets

A provision is recognized when an enterprise has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligations at the end of the reporting period. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the changes in the provision due to the passage of time are recognized as finance cost.

**H) Earning Per Share**

Basic earnings per share are calculated by dividing the profit after tax or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. In case there are any dilutive securities during the period presented, the impact of the same is given to arrive at diluted earnings per share
